1	Well presented and good to see a supportive, enthusiastic TPD	7/10/2016 8:42 AM
2	Really good. I wish all TPDs shared the same views.	7/8/2016 2:39 PM
3	Useful insights into programme flexibility	7/8/2016 11:42 AM
4	I think the system needs to appreciate and accept the importance and necessity of clinical academic training, and tries to establish an adequately efficient route and support throughout. An academic trainee should not be looked at differently as compared with non-academic ones. And they should have equal to the future opportunities.	7/8/2016 10:54 AM
5	It was really usefl to have a non-academic person there to give their viewpoint. I wish all TPDs were as open-minded to academic training.	7/8/2016 10:17 AM
6	Good to know about the possibility of extending clinical training time	6/29/2016 8:49 AM
7	Excellent to get a perspective from out with the academic environment	6/28/2016 5:48 PM

1	Great discussion around my question (about increasing access to research for non-academic trainees). Many thanks.	7/8/2016 2:39 PM
2	Good challenging proposals by Phil Quirke	7/8/2016 11:42 AM
3	Sometimes the discussion was dominated by one person. I think the chair should encourage contribution from each and all of the panel to most if not all of the questions.	7/8/2016 10:17 AM

2	This session had the academic focus tacked-on rather than central to the talk. It would have been interesting to see more discussion of the options trainees can meld academic work with their training, including examples of how people have used their time e.g. OOPR/Es.	7/8/2016 2:39 PM
3	Good overview	7/8/2016 11:42 AM
4	Some useful information, more concrete examples from actual trainees would have helped.	7/8/2016 10:17 AM
